NOte (gentle Reader) that because the vulgar accompt as it were from the Incarnation of Christ, is supposed by the Learned, to differ from the truth, about two yeares,

thane in stead thereofin this Chronologicall Table, resumed the Epoche of yeares from the Baptisme of Christ in the 15. yeare of the Empire of Tiberius Cæsar, enacted and consecrated by the holy Euangelists themselues, and frequently celebrated by the ancient Ecclesiasticall Historye wryters, and Chronographers, and thereby approued true.

Astronomicall Calculations for this present yeare, 1624.

The true precession of the Equinoctiall (according to Tycho Brah, and others the best Astronomers of this our Age) is 28. deg. 36. min. 39. seconds.

The greatest Obliquitie of the Zodiacke is 23. degrees. 31. min. and 30. seconds.

The Eccentrisitie of the Sunne, is 3588. parts, the totall line being 100000.

The true places of the Auges of the Planets according to moderne obseruation. *An. Dom.* 1654.

	Deg.	min.	sec.	
♄	0	7	2	♑
♃	7	23	22	♒
♂	29	25	9	♌
☉	5	56	15	♉
♀	16	55	39	♊
☿	1	14	16	♐

Of the foure quarters of the yeare, and first of Winter.

WInter of Astronomers accounted the first Quarter of the yeare is called of the Latines Hyems, which seemeth to be deriued of the Greeke word signifying to make moist or wet. In Hebrew it is called Choreph comming of the roote Caraph, which signifieth to reproach or disgrace, because thereby the earth is as it were disgraced and exposed to reproach, being spoiled of all its pleasant greennesse, beauty, and splendor. It tooke its beginning vpon the 12. day of December last past, halfe an houre before one of the clocke in the morning, at which moment the Sunne entred into the first scruple of the tropicall signe Capricorne, then being in his greatest declination from the Equinoctiall towards the South, viz. 23. Deg. 31 minu. $\frac{1}{2}$ his Meridionall height being no more then 14 deg. 26. min. $\frac{1}{2}$.

Of the Spring.

THe Spring is called in Latine Ver, comming of the Greeke radicall word Εαρ signifying the same thing.

Others derive it of Vireo, because then Omnia virent, all things flourish. It beginneth at that instant when the Sunne entreth into the first scruple, of the Equinoctiall signe Aries. Which happeneth this yeare the tenth day of March, at one of the clocke and five minutes in the morning. This quarter is of the nature of the ayre, hot and moyst.

Of Summer.

SUmmer in Latine Aestas, is so called of Aestus heate, both which words are derived of the Hebrew roote Esh signifying fire, thereby denoting vnto vs the exceeding hot and fiery nature of this quarter, especially in the Dog dayes. The Hebrewes call it Canis of the roote Cuts, which in Hiphill signifieth to awake or stirre vp. The reason of this denomination is, because that at this time, all things growing vpon the earth are as it were awaked and rouled vp from that heauy slumber, wherewith, all the Winter time, they seemed to be deeply possessed. This Quarter beginneth when the Sunne entreth into the tropicall signe Cancer, then hauing the greatest North declination that can be, viz. 23 deg. 31 min. and an halfe, which commeth to passe this yeare vpon the 11. day of June, at 5. of the clocke and 7 min. in the morning.

Of the Autumne.

AVtumne (so called a bonorum omni augmentatione) is the last quarter Astronomicall, but the third after the common account, and taketh its beginning this yeare vpon the 12 day of September, at 7. of the clocke, and 19 min. at night, that is when the Sunne maketh his ingresse into the first scruple of the Equinoctiall signe Libra. This quarter resembles the earth being cold and drie.

Now for these 4. quarters in briefe, and namely for the fruites they yeeld, take these two verses of Ouid.

Poma dat Autumnus, formosa est messibus æstas,
Ver præbet flores, igne lebatur Hyems.

Cli-

Cleobuli ænigma de anno. Laert. Lib. 1.

Est vnus genitor, nati bona pignora bis sex,
Triginta cuius natæ, sed dispare forma
Hæ niueæ aspectu, nigræq; coloribus istæ,
Atque immortales omnes moriuntur ad vnum.

Eclipses. 1624.

There will be this yeare presented to the view of the Inhabitants of the earth fiue Eclipses, three of the Sunne, and two of the Moone, both which of the Moone will be obserued in our Horizon, the other not.

The first Eclipse will be of the Sunne, appearing to the Inhabitants of Permia in Russia, to the quantitie of 5 points 9 digits, and 24 min. at 8 of the clocke and 56. min. in the morning, the 9. day of March.

The second Eclipse will be of the Moone, vpon the 24. day of March, to the quantitie of 17 Digets and an halfe, the beginning thereof will be at 4. a clocke, and 19. minutes in the morning, the middest at 6. of the clocke, and the end thereof at eight.

The third Eclipse will be of the Sunne, appearing in Magellanica interiore, to the quantity of one Digit, at 3. a clock and 27. min. after noone the 7. day of Aprill.

The fourth Eclipse will be likewise of the Sunne, appearing likewise in Magellanica to the quantity almost of 6. Digets at 8. a clocke and 5. minutes in the morning, the second day of September.

The fift Eclipse will be of the Moone, vpon the 16. day of September, to the quantity of 19. Digets and an halfe, the beginning will be at 6. a clocke in the afternoone, the middest at 7. a clocke and 48. minutes, and the end at 9, a clocke, and 41. minutes.

Of the moueable Feasts.

Moueable Feasts are those which haue no fixed places in the Kalender, and are 6. in number, to wit, Septuagesima Quadragesima, Easter, Rogation Sunday, Ascention and Whitsunday.

Septuagesima, is so called of 70. as it were containing 70. dayes, which the Church doth obserue in remembrance of the 70 yeares, that the Children of Israel were vnder the Babilonian

lonian seruitude, and is alwayes three Sundayes before Quadragesima.

Quadragesima, is simply said of 40. as containing 40 dayes, which the Church recounts in remembrance of the 40 dayes that Moses fasted, when he receiued the Lawes of our Lord, Elias fasted so many dayes, and so many dayes fasted Christ before the tempter came.

Easter is the principall of all other feasts, and so ordained of God at first, and at this day there be three sorts, that is Pascha Hebroeorum, the Iewes Easter, Pascha verum, our Easter: and Pascha novum, the Romans Easter.

The Iewes Easter was commanded to be kept the 14. day of the first moneth called Abib, which day at euen was the Lords Passouer: and the 15 day should be the holy Conuocation.

Our Easter was ordayned 323. yeares after the incarnation, in a Counsell of learned men of diuers nations, assembled by Constantine the great, for that purpose, wherein it was ordayned that Easter should be celebrated on the Sunday next following the first full Moone that should happen after the entrance of the Sun into Aries, and a new Golden number was there deuised for the same intent. But by reason of the Aequinoctium still flyes backward from the 21. of March where then it was, insomuch that it is now about the 11. day, by reason whereof I say there sometimes happens 2. full Moones before we can keepe our Easter, which caused the Romans to alter their Kalender, so that by their Paschall tables they produce Easter alwaies the Sunday following the first ful moon according to the foresaid generall coūcel held at Nice in Pontus.

Rogation is so called because, nos rogat Ecclesia, the Church commanded vs to continue fasting, processions, and prayers as well against the bodily wolues such as late were in France, as also against the spirituall wolues.

Pentecost is so called from Pentecostos which is 50. because there be 50. daies betwixt Easter & Whitsunday inclusiuely. And this time the Church doth obserue in memoriall of the holy Ghost that appeared to the Apostles like clouen tongues. Acts 2.

Of the Heauens, Starres, and Planets.

HEauen, in the mother of Tongues is called Schamaim; which word (as some affirme) is compounded of Scham signifying There or In that place, & Majim, waters. Whereupon they

they conclude, that Heauen is nothing else but Aquæ consolidatæ, waters firmly compacted together, as it were Christall.

The Talmudists alledge that it is either compounded of the verbe Schaah signifying (in Hithpael) to wonder and of Majim, because men are drawne into exceeding admiration, in considering the workemanship of the Heauens: Or of Esch and Majim fire and water. And thereupon Rabbi Bechai in the beginning of Paraſch writheth after this manner: The Heauens (saith he) were created in the beginning, and are called shamajim because they are Esch and majim fire and water. And in Bereſchith Rabba, it is thus read, The Heauens are so called, because men wonder at them saying: Of what are they made? They are made of fire, they are made of water: this is a thing to be admired.

Yet true it is, that many excellent Gramarians suppose that the Hebrew word is neither derivative, nor compound but primative, of which opinion is that famous Hebritian, Valentine Schindler. And Fagius a great author in that tongue (vpon the first chapter of Geneſis) writeth that Abenezra proueth out of the Ismaelitish tongue (which hath very great affinity with the Hebrew) that Schama signifieth nothing else, but High or Above.

But howsoeuer it be, or whatsoeuer is the true Etymologie of that word, this we are sure of, that Heauen in the Scripture is Threefold. 2 Corinth. 12.2.

1 Ayerie, where the Fowles are. Gen. 2 28.

2 Starry, where the Stars are. Gen. 1.17.

3 Glorious, where soules are, and it is called the Heauen of Heauens, 1 Kings 1. 27. and of Philosophers Empyraeum.

The middlemost of which three called the firmament, is that which containeth all those beautifull and bright shining lights, created by the Almighty Elohim. God in three persons vpon the fourth day of the Creation, Gen. 1.14, &c.

Which lights (whether moued in their seuerall spheares according to the generall opinion receiued from reuerend Antiquity: or else mooued as Fishes in the sea, or Fowles in the ayre, according to Tycho Brahe, and others the best moderne obseruators) by the common consent of all Astronomers, are of two sorts, that is to say, Fixed and Wandring, called Planets of Planaomai, signifying to wander. Fixed Stars are deuided into 48. Constellations, which are distinguished into 6 degrees of magnitude; Of the first magnitude are 15. Of

the

the second 45. Of the third 208. Of the fourth 474. Of the fift 217. Of the sixt 49. to which are added 5 of an vncertaine magnitude, called cloudy, and 9. other yet more obscure. of all which seuerall sums the foresaid sum 1023. is made. The Planets are in number 7. which are these, ♄ the highest, and next beneath the fixed stars: ♃ next, then ♂, ☉, ♀, ☿ and ☾, in order. Now for the diameters, magnitudes, and distances of them, aswell fixed as wandring: behold this Table.

Stares of the Magnitude,	haue their diameters in proportion to the Earths diometer, as	their bodies containing the earth body.	Times.	Their distances in Semidiameters of the Earth.	In their meane motions.
1	19 to 4	107 $\frac{1}{6}$			
2	269 to 60	90 $\frac{1}{8}$			
3	25 to 6	70 $\frac{1}{3}$

Phisicall Obseruations.

If thy body be filled with naughty and superfluous humors; then were it conuenient for thee to draw bloud,

Obseruing:

For the { Phlegmaticke / Melancholy / Cholericke / Sanguine } that the moone be in { Aries, or Sagitarius. / Libra, or Aquarius. / Cancer, or Pisces. / any of the foresaid.

Likewise

Likwise you must obserue that the fittest time

For { Youth / Middle age / Elder age / Olde age. } to be let { bloud, is from the } { Change to the first quarter / First quarter to the Full. / Full to the last quarter. / Last quarter to the change.

Notwithstanding these & other such like cautions, if the bloud-letting be for the Phrensie, the Pestilence, the Squinzy, the Pluritie, the Appoplexy, for a continuall head-ach, proceeding of choller or bloud, or for any hot burning feauer, or other extreame paine; A man (I say) in such a case may not carry a chosen time, regularly set downe by the Astronomer, or Phisition, because happily the Patient might miscarry in the meane season.

Briefe Rules of Husbandry.

Sowe, set sæds, plant and graft the Moone in Taurus, Virgo, Capricorne, or Aquarius, the wind not easterly.

Sheare Sheepe in the increase of the Moone.

Fell Tymber for building, towards and in the last quarter of the Moone.

Fell Fryth and Coppice for fewell in the 1. quarter.

Geld and lib cattell the Moone in Aries, Sagitarius, or Capricorne.

Kill fat Swine for Bacon, about full Moone.

Cut Vines in February or March.

Remoove Trees at the last qnarter, betweene Hollantide, and Twelfetide.

Fœlices animæ, quibus hæc cognoscere primum,
Inq; domos superas scandere cura fuit.
Credibile est illos pariter vitiisq; iociſq;
Altius humanis exeruisse Caput.
